PROFESSIONAL SUMMARY

Director - Engineering & Architecture with 14+ years of experience scaling organizations from 0 to 100+, leading modernization programs, and delivering cloud-native, AI-enabled platforms across education, agriculture, and logistics. Expert in combining director-level stakeholder leadership with hands-on architecture to drive execution excellence, cost efficiency, and engineering productivity. Champion for AI enablement through AWS Bedrock implementations, Claude Code/GitHub Copilot guilds, and agentic AI pilot programs.

Key Impact: Cut infrastructure costs 40-55% ($180K+ annually) | Delivered $5M+ platforms with 99.9%+ uptime | Built teams from 0 to 100+ | Improved engineering productivity 30%+ through AI-assisted development | 10k+ Stack Overflow reputation

---

CORE COMPETENCIES

Leadership & Organization: Team Scaling (0 to 100+) | Stakeholder Management | Engineering Culture | Execution Excellence | Performance Management | Distributed Team Leadership | Product Engineering Model | OKR & Roadmap Ownership

Platform & Architecture: .NET Ecosystem | Microservices | Serverless | Event-Driven Architecture | Domain-Driven Design | AWS (Lambda, ECS, API Gateway, Bedrock) | Azure (AKS, Kubernetes, Service Fabric) | Infrastructure as Code

AI & Modern Engineering: AWS Bedrock | Azure AI | Agentic AI | Claude Code | GitHub Copilot | LLM Integration | AI-Assisted Development | Developer Productivity Guilds

Data & Integration: Data Warehouse | ETL Pipelines | Kafka | REST/GraphQL APIs | SQL/NoSQL (MS SQL, PostgreSQL, DynamoDB, Neo4j) | Analytics Platforms | Gateway Patterns

---

PROFESSIONAL EXPERIENCE

CES

Director - Engineering & Architecture | April 2024 – Present

Scaled modernization of legacy recruitment and hiring platform for one of the largest US K-12 education organizations, leading distributed teams, driving AI enablement, and unifying HR product platforms.

- **Built and scaled engineering teams** across onshore and offshore locations from 0 to 100+, establishing delivery rhythm, execution accountability, and quality standards for high-stakes transformation programs
- **Directed multiple scrum teams** through product engineering model, aligning business priorities, platform evolution, and delivery outcomes across interconnected HR domain products
- **Managed director-level stakeholders** across business, product, platform, architecture, and engineering to maintain alignment, accelerate decisions, and drive outcome ownership
- **Unified HR pillar products**, improving interoperability, shared capabilities, and cross-product connectivity between legacy and modern systems through Kafka, AWS, APIs, and gateway-led integration
- **Ran pilot programs and PoCs** for agentic AI workflows, AI-enabled development tooling, and autonomous code generation, advancing organizational AI maturity
- **Established Claude Code and GitHub Copilot guilds**, training 50+ developers on AI-assisted practices and improving delivery productivity 30%+

- **Implemented AWS Bedrock-based solutions** including RAG systems and structured data extraction achieving 95%+ accuracy while optimizing model selection for cost, latency, and quality
- **Owned architecture validation** and technology selection as hands-on architect, guiding critical design decisions, resolving technical blockers, and ensuring architectural integrity
- **Strengthened production operations**, reducing operational incidents 45% through monitoring, observability, alerting, and proactive issue management
- **Drove data warehouse and analytics modernization** including ETL pipeline design, data architecture patterns, and AI/ML integration for predictive analytics

---

Solutions Architect | April 2022 – March 2024

Led project-facing solution architecture for modernization initiatives across logistics, hospitality, and agriculture, combining architecture ownership with hands-on delivery and engineering enablement.

- **Architected complete platform rewrite** of legacy logistics system to Blazor WASM/Server hybrid supporting 500K+ daily transactions, reducing load time 45% and securing $2M+ modernization investment
- **Designed microservices-based loyalty platform** on Azure Kubernetes Service with Domain-Driven Design, delivered MVP in 5 months supporting 100K+ members with 99.95% uptime and sub-200ms response times
- **Led cloud migration** of 3 legacy .NET MVC applications to containerized .NET Core APIs on AWS ECS, cutting infrastructure costs 55% ($180K annually)
- **Established CI/CD pipelines** using Azure DevOps enabling daily deployments and reducing release cycles from 2 weeks to 2 days
- **Built reusable component ecosystems** and shared service libraries across Azure Service Fabric and Blazor platforms, improving engineering velocity

---

Technical Architect | April 2019 – March 2022

Architected serverless microservices platforms and mobile engineering practice with hands-on technical leadership across agriculture domain initiatives.

- **Designed comprehensive serverless architecture** on AWS (Lambda, API Gateway, DynamoDB, PostgreSQL, SQS, Cognito, S3) supporting $5M+ annual operations
- **Built data warehouse and ETL pipelines** for agricultural analytics enabling predictive models for crop optimization and yield forecasting
- **Developed Docker-based testing framework** enabling automated integration testing across 20+ microservices achieving 80%+ coverage
- **Mentored 25 engineers** across distributed locations in serverless patterns, AWS services, and microservices architecture
- **Led cross-platform mobile engineering** using Xamarin.Forms serving 50K+ professionals with 4.5+ star ratings, designed offline-first architecture for field operations

---

Career Progression

Associate Technical Architect | April 2017 – March 2019
Senior Software Engineer | November 2015 – March 2017
Software Engineer, Vofox Solutions | July 2013 – November 2015
Software Developer, Essel Swolutions | January 2012 – July 2013

Progressed from software development into architecture and director-level leadership through consistent expansion of technical scope, delivery ownership, and organizational responsibility.

DOMAIN EXPERTISE

Education: K-12 platforms, recruitment systems, hiring workflows, HR product unification
Agriculture: Cloud-native platforms, mobile applications, data analytics, genomics systems

Logistics: Web platform modernization, supply chain systems, enterprise integration

---

COMMUNITY LEADERSHIP & TECHNICAL CREDIBILITY

- **Stack Overflow:** 10,000+ reputation actively contributing to C#, .NET, Xamarin, and cloud architecture discussions
- **Community Organizer:** Founded XHackers Xamarin User Group Chennai, organized 20+ meetups with 500+ attendees
- **Open Source:** Maintainer for Xamarin/MAUI libraries with published NuGet packages (50K+ downloads)
- **Conference Speaker:** Presented at .NET and Xamarin conferences on architecture, cloud, and modern engineering practices

---

EDUCATION & AWARDS

Bachelor of Technology in Computer Science | Sree Narayana Gurukulam College of Engineering, Kerala, India | 2011

Awards: CESITian Award – Outstanding Technical Contribution (2018) | Best Upcoming Developer – Vofox Solutions (2013) | Community Leadership Award – Xamarin User Group Initiative
